Recurso	Verbo	URI	Header	Body	Respuesta	Status Code	Descripción	
Class	POST	api/v1/classes		{ name : string, Stereotyp : KeyWord }	201 { classId : Guid }	400 - "There is already a class whit this name" 400- "Invalid stereotype value" 400 - "The class name cannot be empty" 400 - "The class name must start whit an uppercase letter." 400 - "The class name must not contain spaces"	Crea una nueva clase con nombre y estereotipo.	
Class	PUT	api/v1/classes/id/		{ name : string, StereoType : string, IdClass : Guid }	200	404 - "There is no class with this id" 404 - "Class is associated whit another class, attribute or method" 400 - "The class name cannot be empty" 400 - "The class name must be start whit an uppercase" 400 - "The class name must be no contain spaces" 400 - "The stereotype is not valid" 400 - "The Object class cannot be updated." 400 - "The stereotype is no valid." 400 - "The class name cannot be empty" 400 - "The class name must start whit an uppercase letter." 400 - "The class name must not contain spaces" 400 - "A sealed class cannot inherit from any class." 400 - "A abstract class cannot inherit from a concrete class." 400 - "A sealed class cannot inherit from a sealed class." 409 - "Class is associated with another class, attribute or method"	Actualiza los datos de una clase existente por su ID.	
Class	DELETE	api/v1/classes/{id}/		---	204	404 - "There is no class whit this id" 409 - "Class is associated whit another class, attribute or method" 400 - "The Object class cannot be deleted." 409 - "Class is associated whit another class, attribute or method"	Elimina una clase por su identificador.	
Attribute	POST	api/v1/attributes		{ name : string, Accessibility : Accessibility, Type : TypeDTO }	201 { createdAttributeId : Guid }	404 - "Return type not found" 400 - "Invalid accessibility value." 404 - "Return type not found" 400 - "Name cannot be null or empty" 400 - "Name cannot exced 50 characters" 400 - "The name is a reserved keyword and is not allowed"	Crea un nuevo atributo con nombre, tipo y nivel de accesibilidad.	
Attribute	POST	api/v1/attributes/{id}/classes/{idClass}		---	201	404 - "Class not found" 400 - "An attribute with the name {attribute.name}	Asocia un atributo existente a una clase específica.	
Attribute	PUT	api/v1/attributes/{id}/		{ name : string, Accessibility : string, IdType : Guid }	200	404 - "Attribute not found" 409 - "Attribute is associate whit class" 400 - "Name cannot exced 50 characte" 400 - "Name cannot be empty" 400 - "Invalid accessibility type" 404 - "Return type not found "	Actualiza los datos de un atributo existente por su ID.	

Recurso	Verbo	URI	Header	Body	Respuesta	Status Code	Descripción	
Attribute	POST	api/v1/attributes/{id}/invokedMethods/{idMthodInkoed}			201	400 - "Attribute no found" 404 - "Invoked method not found" 400 - "In v1 of this program only primitive types are acepted."		
Attribute	DELETE	api/v1/attributes/{id}		---	204	404 - "Attribute not found" 409 - "Attribbute is associate whit a class"	Elimina un atributo por su identificador.	
Method	POST	api/v1/methods		{ name : string, Accessibility : Accessibility, StereoType : KeyWord, ReturnType : TypeDTO }	201 {idMethod}	404 - "Method cannot be null" ver, 400 - "Method return type not found" 409 - "Method whit the same name already exists." 400 - "Invalid accessibility value" 400 - "Invalid stereotype value." 404 - "Method return type not found." 400 - "Method whit the same name already exists."	Crea un nuevo método con nombre, accesibilidad, estereotipo y tipo retorno.	
Method	POST	api/v1/methods/{id}/classes/{classId}		----	201	404 - "Method null." 404 - "Class not found." 400 - "A method whit the same name already exists in the class."	Asocia un metodo a una clase determinada	
Method	POST	api/v1/methods/{id}/invokedMethods/{idToAdd}		---	201	404 - "Method not found." 409 - "Method is already associate with this method." 404 - ¨Method null.¨ 404 - ¨Invoked method no found.¨ 400 - ¨The method whir ID {method.Id} does not exist in class of attribute {attribute. Name} or its ancesttors.¨ 400 - ¨The method whir ID {method.Id} does not exist in class of attribute {param.Name} or its ancesttors.¨ 400 - ¨The method whir ID {method.Id} does not exist in class of attribute {localVar.Name} or its ancesttors.¨ 400 - ¨The method whir ID {invokedMethod.Id} does not match any parameter, local variable, or attribute in method {method.Name}¨	Asocia una invocacion a un metodo, esto indica como va a invocar un metodo dentro de un metodo	
Method	POST	api/v1/methods/{id}/localVariables/{localVariableId}		---	201	404 - "Method null." 404 - "Local Variable not found" 400 - "A variable or parameter with the same name already exists."	Asocia una variable local a un método específico.	

Recurso	Verbo	URI	Header	Body	Respuesta	Status Code	Descripción	
Method	POST	api/v1/methods/{Id}/parameters/{parameterId}		---	201	404 - "Method null." 404 - "Parameter not found" 400 - "A variable or parameter with the same name already exists."	Asocia un parámetro a un método específico.	
Method	DELETE	api/vi/methods/{id}		---	204	404 - "Method not found." 409 - "Method is associated with another method." 404 - "Method null." 409 - "Method is assocciate whit class." 409 - "Method is associate whit InvokedMethod"	Elimina un método por su identificador (nota: URI tiene error de tipo).	
Method	GET	api/v1/method/{methodId}/referenceClass/{referenceId}/objec	------		200	404 - "Class not found" 404 - "Method null." 404 - "Method is not in class"		
Parameter	POST	api/v1/parameters		{ name : string, ParameterType : TypeDTO }	201 { parameterId : Guid }	404 - ""Parameter cannot be null." 409 - "Method return type no found" 400 - "Parameter Name cannot be empty"	Crea un nuevo parámetro con nombre y tipo.	
Parameter	POST	api/v1/parameters/{id}/invokedMethods/{idInvokedMethod}			201	404 - "Parameter not found" 404 - "Invoked Method no found" 400 - "In v1 of this program only primitive types are acepted."	Asocia un parametro a su posible invocacion	
LocalVariable	POST	api/v1/localVariables		{ name : string, LocalVariableType : TypeDTO }	20 1{ localVariableId : Guid }	404 - ""Local Variable cannot be null." 409 - "Method return type no found" 400 - "Local Variable Name cannot be empty."	Crea una nueva variable local con su tipo y nombre.	
Parameter	POST	api/v1/localVaraibles/{id}/invokedMethods/{idInvokedMethod}			201	404 - "Local Varaible not found" 404 - "Invoked Method no found" 400 - "In v1 of this program only primitive types are acepted."	Asocia un atributo a su posible invocacion	
InvokedMethod	POST	api/v1/invkedMethods		{ReferenceName : string, methodId : Guid}	201 {invokedMethodId}	404 - "Invoked Method cannot be null." 404 - "Method null." 400 - "Invoked	Asocia un metodo a su posible invocacion
